

HeBoFill® 205 is a pure Boron Nitride powder incorporating particularly fine particles. In addition it exhibits a narrow grain size distribution. It improves the high temperature properties of oils and greases and serves as a filler in release agents.

- Advantages**
- ▶ Optimum release and lubricating properties - also at high temperatures
 - ▶ Good distribution within liquid systems
 - ▶ Electrically insulating
 - ▶ Very fine particle size
 - ▶ High purity
 - ▶ Very low formation of agglomerates
 - ▶ High specific surface area
 - ▶ Physiologically safe

- Typical Applications**
- ▶ Filler and additive in oils and greases to improve high temperature lubricating properties
 - ▶ Filler in release agents

- Typical Values**
- ▶ Colour: White
 - ▶ Boron Nitride: > 98.5 %
 - ▶ Total Oxygen: < 1.0 %
 - ▶ Boron Oxide: < 0.1 %
 - ▶ Carbon: < 0.1 %
 - ▶ Specific Surface Area (BET): ~ 20 m²/g
 - ▶ Median Particle Size (D₅₀): 3 µm

- Packing Units** ▶ 1 kg and 10 kg in plastic bags

Storage and Safety Keep dry. Minimum storage life 12 months in original packaging. For further information, please refer to safety data sheet.

The data quoted in this leaflet are typical for the material. They are intended as a guide only and should not be used in preparing detailed specifications. Actual product data may deviate from the figures given. We reserve the right to alter product data within the scope of technical progress and new developments. Since processing involves factors that are beyond our control, recommendations made in this leaflet should be checked by preliminary trials, especially for third party applications. These recommendations do not absolve the user from the obligation of investigating the possibility of infringement of third parties' rights and, if necessary, from clarifying the situation.
