

**HeBoFill® 410** is a pure Boron Nitride powder with good crystallinity and fine particles. The average particle size is 2 µm. It is particularly suitable for use as a high temperature additive in lubricants.

- Advantages**
- ▶ Optimum release and lubricating properties - also at high temperatures
  - ▶ Good distribution within liquid systems
  - ▶ Electrically insulating
  - ▶ High purity
  - ▶ Very fine particle size
  - ▶ Virtually free of agglomerates
  - ▶ High specific surface area
  - ▶ Physiologically safe

- Typical Applications**
- ▶ High temperature additive in oils and greases
  - ▶ Additive in release agents and refractory coatings

- Typical Values**
- ▶ Colour: White
  - ▶ Boron Nitride: > 98.5 %
  - ▶ Total Oxygen: < 1.5 %
  - ▶ Boron Oxide: < 0.1 %
  - ▶ Carbon: < 0.1 %
  - ▶ Specific Surface Area (BET): ~ 20 m<sup>2</sup>/g
  - ▶ Median Particle Size (D<sub>50</sub>): 2 µm

- Packing Units**
- ▶ 1 kg and 5 kg in plastic bags
  - ▶ 20 kg in hard paper drums

**Storage and Safety** Keep dry. Minimum storage life 12 months in original packaging. For further information, please refer to safety data sheet.

The data quoted in this leaflet are typical for the material. They are intended as a guide only and should not be used in preparing detailed specifications. Actual product data may deviate from the figures given. We reserve the right to alter product data within the scope of technical progress and new developments. Since processing involves factors that are beyond our control, recommendations made in this leaflet should be checked by preliminary trials, especially for third party applications. These recommendations do not absolve the user from the obligation of investigating the possibility of infringement of third parties' rights and, if necessary, from clarifying the situation.
