

# HeBoCoat® Color green

Colour concentrate

**HeBoCoat®** Color green is a green colour concentrate, which is used as an additive in our water-based Boron Nitride suspensions. The light Boron Nitride suspension is given a green colouring by adding **HeBoCoat®** Color green. This improves the contrast and visibility of the Boron Nitride suspension, especially on light surfaces, thus facilitating the coating process. The organic part of the colour decomposes at high temperature and the original colour of the suspension reappears again.

- Properties**
  - ▶ Improved visibility during coating
  - ▶ Easy handling by mixing with the Boron Nitride suspension
  - ▶ Colour disappears under high temperature applications
  
- Typical Areas of Application**
  - ▶ In coatings for aluminium casting processes
  - ▶ In general for better visibility during coating
  
- Technical Data**
  - ▶ Colour: Brilliant green
  - ▶ Concentration: 0.3 %
  - ▶ Mixing ratio: 1 : 100  
1 kg for min. 100 kg suspension,  
depending on the desired colour strength
  
- Packing Units**
  - ▶ 1 kg in plastic bottle
  
- Storage and Safety**

Store in dry conditions and protect from frost. Minimum shelf life 12 months if stored in original packaging and under appropriate conditions. For further information please refer to the current safety data sheet.

The data quoted in this leaflet are typical for the material. They are intended as a guide only and should not be used in preparing detailed specifications. Actual product data may deviate from the figures given. We reserve the right to alter product data within the scope of technical progress and new developments. Since processing involves factors that are beyond our control, recommendations made in this leaflet should be checked by preliminary trials, especially for third party applications. These recommendations do not absolve the user from the obligation of investigating the possibility of infringement of third parties' rights and, if necessary, from clarifying the situation.
