

HeBoFill® BL-SP 040

Basic Line - Single Platelet + D₅₀ 10

HeBoFill® BL-SP 040 is a Boron Nitride powder exhibiting a defined platelet structure and high purity. Virtually no formation of agglomerates. As a filler and additive it improves the temperature resistance and the thermal conductivity.

- Advantages**
- ▶ Very good thermal conductivity - even at low filling levels
 - ▶ Optimum lubricating and release properties, also at high temperatures
 - ▶ Low viscosity increase
 - ▶ Electrically insulating
 - ▶ Low formation of agglomerates
 - ▶ Physiologically safe

- Typical Applications**
- ▶ Filler in lubricants and release agents
 - ▶ Filler for polymers

- Technical Values**
- ▶ Colour: White
 - ▶ Boron Nitride: > 98.5 %
 - ▶ Total Oxygen: < 1.0 %
 - ▶ Boron Oxide: < 0.1 %
 - ▶ Carbon: < 0.1 %
 - ▶ Specific Surface Area (BET): ~ 13 m²/g
 - ▶ Median Particle Size (D₅₀): 4 µm

- Packing Units**
- ▶ 1 kg in plastic bags
 - ▶ 10 kg and 20 kg in compressed fibre drums

Storage and Safety Keep dry. Original containers can be stored for at least 12 months from date of delivery. For further information, please refer to the safety data sheet.

The data quoted in this leaflet are typical for the material. They are intended as a guide only and should not be used in preparing detailed specifications. Actual product data may deviate from the figures given. We reserve the right to alter product data within the scope of technical progress and new developments. Since processing involves factors that are beyond our control, recommendations made in this leaflet should be checked by preliminary trials, especially for third party applications. These recommendations do not absolve the user from the obligation of investigating the possibility of infringement of third parties' rights and, if necessary, from clarifying the situation.
