

HeBoSint®

Typical Areas of Application *

HeBoSint® Grade	PURE LINE	CLASSIC LINE	STRONG LINE
Components for high-temperature electric furnaces	■	■	
Insulators for plasma-jet furnaces, ion engines and PVD-ARC equipment	■	■	■
Mechanical components, pipes and nozzles for liquid metal handling		■	
Protective tubes and insulating sleeves for thermo couples	■	■	
Molten metal and gas sensor components	■	■	
Crucibles for metal evaporation	■	■	■
Components for metal and glass melts	■	■	■
Components used in the glass production		■	■
Mounts, mounting plates, substrates and components for thermal management		■	■
Casting components for precious metals, dental and other special alloys	■	■	

* Do you have specific application. Please ask us for more detailed information.
